

The Vidant Bertie Hospital Development Council was able to purchase a Panda Warmer, a state-of-the-art piece of equipment that provides high quality care to our newborns and infants. The Panda warmer is an all-in-one innovative technology that assists clinicians with providing infant care seamlessly.

The warmer features an integrated scale to assess the infants weight and direct heat application so our providers can interact with the newborns while keeping them warm and content. The warmer is also equipped with a fully integrated, life-saving tool that equips our providers with the ability to monitor the infant's heart rate and oxygen levels, as well as provide supplemental oxygen in the event that the infant is unable to fully breathe on his own.

Vidant Bertie Hospital was recognized as one of the American Rural Hospital Association's top-20 hospitals based on patient satisfaction.

The Vidant Bertie Hospital Development Council was unable to hold their Denim to Diamonds event, but was grateful for the generous support given through a mailed campaign.
